The image is a screenshot of the Android Studio development environment. On the left, the 'AndroidManifest.xml' file is open in the editor, showing the configuration for an application named 'day-6'. The manifest includes an application element with attributes for backup, icon, label, round icon, RTL support, and theme. It also defines two activities: 'SplashActivity' and 'MainActivity'. The 'SplashActivity' is configured with an intent filter for the main action and the LAUNCHER category. The 'MainActivity' is also configured with an intent filter for the main action and the LAUNCHER category. On the right, a mobile emulator is displayed, showing a splash screen with a blue-to-purple gradient background. The text 'Tech Errors' is written in a stylized, glowing font in the center of the screen. The emulator's status bar at the top shows a battery level of 100% and a signal strength indicator. The bottom of the emulator shows a navigation bar with icons for back, home, and recent apps.
